4. OUTLOOK

Fatty Acids and Soap

The market for fatty acids mostly depends on their consumption for toilet soap production. During the year, the toilet soap market was stagnant and even the established brand owners are at difficulty to maintain their existing sales. Consequently the offtake by some of the major customers is abnormally low. Further, some of the competitors in the market for fatty acids have an edge over the company due to their backward integration to source raw material and few of such competitors are, curiously, vendors of raw materials to the company too. As a result the company could not utilize the full capacity of fatty acid, soap and glycerine plants after the recent expansion with latest technology.

Biomass Power Plant

Restrictions on power consumption came into operation again from 06-02-2014 after a brief period of about six months. Yet, the company was able to carry out its operations normally, only because of Biomass Captive Power Plant. The company is not allowed to draw power even at extra cost during the periods of Biomass Power Plant maintenance due to restrictions on power consumption. Ironically, this year the company is not allowed to purchase power even under Open Access inspite of repeated representations, on frivolous grounds. Therefore the company is always at the risk of stoppage of production if there is any problem in power plant. Capacity utilization of Biomass Power Plant is satisfactory taking into consideration the fuel constraints experienced by the company. Since the continuous running of power plant is very essential, biomass fuels are having to be procured even at a higher cost.

Wind Energy Generators (WEGs)

Power generation during the year from the four Wind Energy Generators (WEGs) of the Company aggregating to 6.3 Mw capacity is very low at 110.56 lakh kwh as against the previous year 164.18 lakh units, mainly due to back down of WEGs for want of evacuation by Tamil Nadu Electricity Generation and Distribution Corporation Limited (TANGEDCO). The wind velocity during the year in general was considered good as compared to previous year and at least 10% increase in generation over the previous year was expected. TANGEDCO failed to evacuate power on priority basis as there were other cheaper sources of power at its disposal. The Indian Wind Power Association is fighting for 'must run' status to WEGs to avoid back down in future. The estimated loss of income from the four WEGs due to back down is about Rs.200 lakhs during the year.

Credit Rating

The Credit Rating Agency CARE reaffirmed the credit rating of the Company 'CARE A+' (adequate degree of safety regarding timely servicing of financial obligations) for long term facilities and 'CARE A1' (strong degree of safety regarding timely payment of financial obligations) for short term facilities from banks.

5. CONSERVATION OF ENERGY & ENVIRONMENTAL SAFETY

- a) Air Handling Unit provided in Electrolyser Control Panel Room for reducing ambient temperature to avoid premature failure & malfunctioning of electronic components such as Programmed Logic Circuit (PLC), Control Cords etc.
- b) Solar Photo Voltaic Cells (Plates) arranged at Biomass Collection Point to utilize solar power for Weigh Bridge.
- c) Left over Hydrogen gas after reaction in Autoclave, successfully recovered and used in subsequent batches.
- d) Heat released in condensation of glycerine, used to evaporate the Sweet Water in Glycerine Distillation Plant.
- e) Steam generated from Vapour Liquid Separator in Continuous Neutralisation and Drying Plant, used for melting Lauric Acid.
- f) Three thousand Eucalyptus saplings planted in the factory premises during the year to promote green belt.

6. FOREIGN EXCHANGE EARNINGS AND OUTGO

During the year under review, the Company earned foreign exchange equivalent to Rs.12,34,262 (previous year - 1,30,50,778). The exports have come down because of high raw-material prices and competition from countries like Malaysia and Indonesia for supply of similar products. The Company imported raw materials and equipment during the year resulting in foreign exchange outgo equivalent to Rs. 33,77,50,837 (previous year - Rs. 43,58,19,914).

7. FINANCE

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

a. Industry Structure and Developments :

The Company is engaged in the manufacture of Stearic Acid, Fatty Acids, Refined Glycerine, Soap Noodles, Toilet Soap and Industrial Oxygen and in the generation of Power from biomass and wind. Non-edible oils and fatty acid distillates, both indigenous and imported, are used as raw materials for manufacturing the finished products. The products manufactured are marketed directly from the factory as well as through Depots and C&F Agents located in major cities across the country. The Company also undertakes to manufacture Soap Noodles and Toilet Soap on jobwork for reputed customers.

The Company is having 6 Mw Biomass Cogeneration Captive Power Plant located within the factory premises and the surplus power is sold to APSPDCL. It is also having four Wind Energy Generators (WEG) set up in Tamil Nadu and the power generated from these plants is sold to Tamil Nadu Generation and Distribution Corporation Ltd. (TANGEDCO).

Majority of the Fatty Acids produced in the industry are consumed as raw material in Soap industry for making Toilet Soap. Hence performance of toilet soap industry will also have its impact on the demand for fatty acids. Stearic Acid is a chemical used in rubber, plastic, metal polish and number of other industries and any changes in demand by the major user industries may lead to fluctuations in demand. Glycerine and Industrial Oxygen are by-products.

The country is short of both edible and non-edible oils. Therefore the fatty acid industry is heavily dependent on imports of palm based products from Malaysia and Indonesia. As a result, the supply and demand position in the international market for vegetable oils influence the indigenous market. Further, fluctuation in crude oil prices also have impact on edible and non edible oils due to their usage in production of biofuels.

The fuels intended for running the biomass power plant are Rice Husk, field residues like Cotton Stalk, Chili Stalk etc., available in the surrounding areas. Their availability is not only limited but also seasonal. Shortage of labour, farm works during the season, high labour cost, influence their procurement. Transportation and storage of cotton stalk is a problem due to low bulk density, procurement of large quantity, fire hazards etc. During the year the Company was able to procure a good quantity of Rice Husk and Cotton Stalk. Efforts to mechanize the process of receipt and storage of biomass by baling to reduce volume could not make much progress due to technical problems encountered. The capacity utilization of the power plant during the year is also satisfactory due to improved procurement of fuels.

Steam and power requirements of Process Plants are met from the Biomass Power Plant. Without the captive power plant it would have been impossible to run the plants from the power supply of the State Utilities due to the Restriction and Control (R&C) measures imposed on power consumption with effect from 06-02-2014 due to power shortage.

Continuous development efforts are being made to absorb the latest technologies and practices. Quality Management Systems (QMS) Standard ISO 9001:2008 obtained from a renowned certification agency, Det Norske Veritas (DNV) is being followed by the Company.

b. Opportunities and Threats :

Major portion of fatty acids produced is consumed by the toilet soap industry. The performance of the toilet soap industry continued to be sluggish in 2013-14. The demand for Fatty Acids consumed in other industries like rubber, metal polish, plastics, cosmetics etc., was also not encouraging during the year. Toilet Soap is a fast moving consumer product and the industry is expected to revive in due course of time.

The Company is also facing stiff competition due to the entry of certain big players into the Fatty Acid and Soap Noodles market. Because of their large production capacities, backward integration and huge financial strength in other areas they are offering their products at very low prices to make an entry into the market. But these low prices cannot be sustained for long and market is expected to find its own price levels.

The standard rate of Excise Duty at 10% was increased to 12% in the Budget 2012. All most all the goods manufactured by the Company attract 12% duty. The disadvantage experienced in cost of production by the units located in non exempted areas as compared to the units located in duty exempted areas is further aggravated to the extent of difference in duty.

Toilet Soap market is dominated by a few well established brands and manufacturers. Toilet Soap being a consumer product requires extensive market network, brand image, advertisement etc., for successful marketing. Corporations having good market network are entering the toilet soap market with new brands by outsourcing. There are opportunities to meet such requirements but the volumes are limited in scope at present as these manufacturers themselves have created additional production facilities in the exempted areas.

There is an acute power shortage in the State of Andhra Pradesh. Until now, whenever Biomass Cogeneration Captive Power Plant is under maintenance or during outages, the company was drawing power from the State Utilities at a higher cost for running the plants. The situation has now changed after the introduction of restrictions on power consumption since

6-2-2014 and the industry is not allowed to draw extra power even at an additional cost. Strangely, the company is also not allowed to purchase power from third parties under Open Access System. Therefore when captive power plant is not in operation the company is depending on power generated from DG sets which is very costly.

The wind velocity during the year under consideration was regarded to be better than the previous and the company expected higher generation by about 10% over the previous year generation of 164.18 lakh kwh. All these expectations failed to materialize due to back down of WEGs for lack of power evacuation by TANGEDCO. The actual generation recorded is 110.56 lakh kwh only which resulted in loss of revenue by about Rs. 200 lakhs. The Indian Wind Power Association (Association) in which the company is a member has been fighting for 'must run' status for WEGs from TANGEDCO. TANGEDCO has not been giving priority for power generated by WEGs when other sources of cheaper power supply is available to it.

A year ago, TANGEDCO was delaying payments for power supplied by more than a year after the due date. After continued persuasion by the Association the position has now improved and the developers are receiving payments with only one or two months delay after the due date. Tamil Nadu Electricity Regulatory Commission (TNERC) has directed TANGEDCO to pay interest at one per cent per month on the delayed payments and these Orders were also upheld by the Appellate Tribunal for Electricity (ATE), New Delhi on the appeal filed by TANGEDCO.

c. Segment-wise or Product-wise performance :

Segment-wise performance of the Company is given separately at Page No. 60.

d. Outlook :

The toilet soap industry is expected to recover from the slowdown since 2011-12. The technical upgradation and increase in plant capacities of fatty acid, soap and glycerine plants under expansion cum modernization programme are expected to help to improve the operations of the Company once the market conditions in fatty acid industry improve. The Company will have to face challenges from new entrants into the industry which may affect its profitability.

e. Risks and Concerns:

Any increase in Excise Duty on the goods manufactured by the Company may be unfavourable to the Company as it may result in increase in cost of production of goods manufactured by the Company as compared to the similar goods manufactured in the Excise exempted areas.

The wide fluctuations in raw material prices in the international market affect the prices of final products which may result in conditions sometimes favourable or at other times unfavourable to the Company, inspite of taking precautions to avoid risks in price fluctuations.

Generation of power by Biomass Power Plant depends on availability of biomass and its cost. Generation of power by wind mills depends on wind velocity and the policy of TANGEDCO to prioritize evacuation over the other sources of energy available to it. The profitability of Biomass Power Plant and Wind Energy Generators largely depends upon the purchase price fixed by the Governments for purchase of energy from renewable sources of energy as a promotional measure.

f. Internal Control System and their adequacy:

The Company has proper and adequate internal control procedures commensurate with its size and nature of business. These internal control procedures ensure protection to the resources of the Company and compliance with the policies, procedures and statutes.

The internal controls are supplemented by internal audits by M/s. Mastanaiah & Co., Chartered Accountants, Guntur. The internal controls and internal audit ensure that appropriate finance records are available for preparing finance statements and other data for maintaining accountability of assets.

g. Financial Performance with respect to Operational Performance:

Financial performance is not satisfactory with respect to operational performance in 2013-14 as compared to 2012-13. While the operations have come down by about 15%, the Profit Before Tax has declined by 23% due to severe competition in the market and aggressive marketing by competitors.

h. Human Resources:

The Company employed 763 persons as on 31st March 2014 both in the factory and office. The Management of the Company maintains good relations with the employees. There have been no labour problems since the inception of the Company in 1980.

i. The Management of the Company discloses all material, financial and commercial transactions where they have personal interest that may have potential conflict with the interest of the Company at large to the Board of Directors.

We conducted our audit in accordance with the standards on Auditing issued by the Institute of Chartered Accountants of India. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.
